FOR IMMEDIATE RELEASE

## Engine Components International and Team AeroDynamix Create Official Team Partnership - *Synergy at Its Best* Announced at SUN 'n FUN -

Lakeland, Florida (April 11) – Team AeroDynamix and Engine Components International (ECi®) announced today a strategic partnership between the precision formation aerobatic team and the TITAN® Engine manufacturer. In a joint press conference at SUN 'n FUN International Fly-In and Expo, Team AeroDynamix introduced ECi as an Official Team Partner. The businesses call their new alliance ***Synergy at Its Best***, and said that a commitment to innovation is the core attraction for both.

"This partnership is the perfect fit for Team AeroDynamix and ECi," said Tim Morland, General Manager for ECi. "Our recently launched TITAN engine assembly program will be aligned with this professional aerobatic team that is distinct among air show acts and has strong connections with the experimental and RV aircraft market," said Morland.

Team AeroDynamix Flight Lead and Founder, Mike Stewart, said "Team AeroDynamix is proud to enter into this business alliance with ECi at the outset of their engine assembly program. Their support will allow us to focus on flying our signature form of close formation aerobatics at air shows across the country. From a technical standpoint, our pilots are thrilled to associate with the TITAN® Stroker™ series engines which boast the highest power-to-weight ratio in the industry."

For ECi, this is the first major sponsorship investment in the company's 70-year history. This bold step speaks to the confidence the company has in both the experimental market and in Team AeroDynamix to influence customers in a positive, inspiring way.

Stewart said Team AeroDynamix is appreciative not only for support from ECi but also to be able to welcome them into the team's growing family of sponsors at SUN 'n FUN early in the 2013 air show season.

[Team AeroDynamix](#) combines graceful aerobatics with precision formation to fill the sky with an action-packed performance. No other air show act in the world flies as many airplanes at one time as does Team AeroDynamix. The team flies day and night routines nationally and internationally at air shows, aviation expos, civic festivals, special events, and sporting events.

[Engine Components International](#) (ECi®) is an international distribution leader of piston engine parts, services, and powerplants. Since 1943, ECi has been a leader in engine component repair, parts design engineering, and manufacturing. ECi now offers complete TITAN® Engine assembly and run-in testing for experimental and certified airframes.
